

Task 17 – Monthly Sales Trend

Data Analytics Internship – VEDA Technology

1. Objective

Summarize sales by month and visualize the trend using Microsoft Excel.

2. Dataset

Sample Superstore dataset with Order Date, Sales and related order, customer and product fields.

3. Tools Used

Microsoft Excel, PivotTable and Line Chart.

4. Procedure

Step	Activity
1	Verified Order Date and Sales columns and formatted dates.
2	Created one PivotTable with Order Date in Rows and Sales in Values.
3	Grouped the date data into months and arranged the months chronologically.
4	Created one line chart titled Monthly Sales Trend.
5	Recorded key findings from the monthly sales summary.

5. Monthly Sales Summary

Month	Sales
January	94,924.84
February	59,751.25
March	205,005.49
April	137,762.13
May	155,028.81
June	152,718.68
July	147,238.10
August	159,044.06
September	307,649.95
October	200,322.98
November	352,461.07
December	325,293.50
Grand Total	2,297,200.86

6. Key Findings

- September recorded monthly sales of approximately 307,649.95.
- February recorded monthly sales of approximately 59,751.25.
- Sales increased sharply from August to September.
- November and December recorded relatively high monthly sales.
- The line chart shows noticeable fluctuations across the months.

7. Deliverables Completed

- ✓ One monthly Sales PivotTable
- ✓ One Monthly Sales Trend line chart
- ✓ Key findings

8. Conclusion

The task demonstrated practical use of Excel PivotTables for monthly aggregation and line charts for communicating sales trends.
